"The eye cannot see, what the mind does not know"
Dr Janes C . Burns MD, Rady Childrens Hospital San Diego

St.Gregorios Cardio-Vascular Centre is the fulfillment of an initiative to facilitate quality cardiac care services including both pediatric and adult surgeries to the people in the village of Parumala, started in 2004 by Eminent Cardio-Thoracic Surgeon Dr. K.M .Cherian, Frontier Life Line, Chennai. SGCVC Parumala had received ISO 9001:2008 certificate for quality cardiac care services. In parumala here we have all kinds of advanced cardiac treatments including interventional procedures for both adult and pediatric heart diseases. This super specialty center in the village was a dream of our former president of India, Dr. A.P.J Abdul Kalam who had visited us in 2006.

Kawasaki syndrome is an acute self-limiting vasculitis affecting infants and children with unknown etiology. Development of coronary artery aneurysm is one of the most detrimental sequelae of Kawasaki disease. This summit will be useful for the Cardiologists, Pediatricians, post graduates and other all referring doctors to update the newer developments in the field of research in Kawasaki syndrome. We are also enlightening valvular heart diseases in children and management issues in the afternoon session.

"I am happy to find that a high technology Cardio Thoracic and Vascular Diseases Centre has been created in a remote Panchayat (Parumala) in Kerala which is a dream for every rural Indian. His Excellency, President Dr. A. P. J. Abdul Kalam. December 18, 2005.

We are proud to organize first state level summit on Kawasaki Syndrome and Valvular Diseases in Children mainly focusing on management issues. Dr. K. M. Cherian Heart Foundation and St Gregorios Cardio-Vascular Center welcome you for this one day summit.
