Welcomes you to

5TH KAWASAKI DISEASE SUMMIT OF INDIA

2nd July 2017, Sunday

Venue: NIMHANS Auditorium

Dr Tomisaku Kawasaki first published his collection of 50 cases of acute "mucocutaneous lymph node syndrome" in Japanese Journal of Allergy in 1967. After initial skepticism, this syndrome was recognized as a separate disease entity and was named eponymously after Dr Kawasaki. This year (2017) marks the 50th anniversary since the first publication of KD case series. On this occasion, we are proud to host the 5th Kawasaki Disease Summit of India at Bengaluru.
